

# MASTHEAD AMPLIFIER/BOOSTER - MHW24G

**AUSTRALIAN  
MADE**

**For use when your TV Antenna needs boosting in fringe areas or where the signal is weakened by buildings or trees.**

- ¥ Masthead type booster has been modified to allow booster to be installed inside caravan. With only a 4 metre lead from our antenna, signal loss is insignificant.
- ¥ No extra leads are required - we supply everything you need.
- ¥ Just plug in the power supply to a 240V outlet in your van, connect the coaxial leads supplied with the unit and boost is automatic.
- ¥ The booster can be easily bypassed when it is not required.
- ¥ 12 volt model available.
- ¥ An ultra wide band, low noise masthead amplifier specifically designed for combined UHF/VHF antennae (all Happy Wanderer models).
- ¥ Field tested by the manufacturer G.M.E. KINGRAY.
- ¥ Variable VHF and fixed 24dB UHF gain.
- ¥ Also boosts other caravan antenna types.
